

Plastic Waste Diversion Credit Certificate Supporting Documents

Independent Limited Assurance Report to City Government of Iloilo

We were engaged by the Board of Directors / Registered Owners of City Government of Iloilo ("the Company") to undertake a limited assurance engagement in respect of the year ended December 31, 2025, on the Plastic Waste Diversion Credit Certificate ("the Report") pursuant to the provisions of RA11898 otherwise known as the EPR ACT of 2022 as described below to be submitted to the Department of Environment and Natural Resources ("the Department") as part of the Environmental Compliance Audit Report.

Subject Matter and Applicable Criteria

The scope of our limited assurance engagement, as agreed with management, comprises the Report. There are no mandatory requirements for the preparation, publication or review of the Report. As such, pending the development and implementation of the Uniform Standards to be developed by the Department, the implementable provisions of the interim standards ("the Standard") of the Philippine Alliance for Recycling and Materials Sustainability ("PARMS"), Inc. was used as reference.

Management's responsibilities

Management is responsible for the preparation and presentation of the Report in accordance with the Sustainability Reporting Guidelines (G4) of the Global Reporting Initiative, and the information and assertions contained within it; for determining the Company's objectives in respect of sustainable development performance and reporting, including the identification of stakeholders and material issues; and for establishing and maintaining appropriate performance management and internal control systems from which the reported performance information is derived.

Management is responsible for preventing and detecting fraud and for identifying and ensuring that the Company complies with laws and regulations applicable to its activities

Management is also responsible for ensuring that staff involved with the preparation and presentation of the description and Report are properly trained, information systems are properly updated and that any changes in reporting encompass all significant business units.

Auditor's responsibilities

Our responsibility is to carry out a limited assurance engagement and to express a conclusion based on the work performed. We conducted our engagement in accordance with International Standard on Assurance Engagements (ISAE) 3000, Assurance Engagements other than Audits or Reviews of Historical Financial Information, issued by the International Auditing and Assurance Standards Board. That Standard requires that we plan and perform the engagement to obtain limited assurance about whether the Report is free from material misstatement.

The firm applies International Standard on Quality Control 1 and accordingly maintains a comprehensive system of quality control including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

We have complied with the independence and other ethical requirements of the Code of Ethics for Professional Accountants issued by the International Ethics Standards Board for Accountants, which is founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behavior.

Procedures performed

A limited assurance engagement on a sustainability report consists of making inquiries, primarily of persons responsible for the preparation of information presented in the Report, and applying analytical and other evidence gathering procedures, as appropriate. These procedures included:

1. Inquiries of management to gain an understanding of the Company's processes for determining the material issues for the Company's key stakeholder groups.
2. Interviews with senior management and relevant staff at group level and selected business unit level concerning sustainability strategy and policies for material issues, and the implementation of these across the business.
3. Interviews with relevant staff at the corporate and business unit level responsible for providing the information in the Report.
4. Visits to sites operating in city A, city B and city C, when applicable, selected on the basis of a risk analysis including the consideration of both quantitative and qualitative criteria
5. Comparing the information presented in the Report to corresponding information in the relevant underlying sources to determine whether all the relevant information contained in such underlying sources has been included in the Report.

6. Reading the information presented in the Report to determine whether it is in line with our overall knowledge of, and experience with, the sustainability performance of the Company.

The procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement, and consequently the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained has a reasonable assurance engagement been performed.

Inherent limitations

Due to the inherent limitations of any internal control structure, it is possible that errors or irregularities in the information presented in the Report may occur and not be detected. Our engagement is not designed to detect all weaknesses in the internal controls over the preparation and presentation of the Report, as the engagement has not been performed continuously throughout the period and the procedures performed were undertaken on a test basis.

Conclusion

Our conclusion has been formed on the basis of, and is subject to, the matters outlined in this report.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our conclusions.

Based on the procedures performed and the evidence obtained, as described above, nothing has come to our attention that causes us to believe that the Report of the company for the year ended December 31, is not presented, in all material respects, in accordance with the Sustainability Reporting Guidelines (G4) of the Global Reporting O Initiative.

In accordance with the terms of our engagement, this independent limited assurance report on the Report has been prepared for the Company in connection with reporting to the Department through PARMS as its Producers Responsibility Organization and for no other purpose or in any other context.

Restriction of use of our report

Our report should not be regarded as suitable to be used or relied on by any party wishing to acquire rights against us other than the Company, for any purpose or in any other context. Any party other than the Company who obtains access to our report or a copy thereof and chooses to rely on our report (or any part thereof) will do so at its own risk. To the fullest extent permitted by law, we accept or assume no responsibility and deny any liability to any party other than the Company for our work, for this independent limited assurance report, or for the conclusions we have reached.

Our report is released to the department on the basis that it shall not be copied, referred to or disclosed, in whole or in part, without our prior written consent.
